

## DATA SHEET: **NUVO Form S0** (Metal)

### SCREW-ON METAL PANELS SYSTEM

#### **Product:**

NUVOform-S0™ Custom formed, pre-engineered metal panel system for unique, non-traditional cladding requirements.

#### **Material:**

Aluminum Sheet: 3003-H14 alloy (Standard) or 5005-H34 alloy (For use with anodized finishes).

Stainless Steel Sheet: Type 304 (Standard) or 316 (For higher degree of corrosion resistance).

Galvanized Steel Sheet: Galvanneal Satin Coat.

#### **Suspension:**

Mechanically fastened to Support structure by installing Contractor.

#### **Finishes:**

Aluminum: Baked polyester powder, or two or three coat fluoropolymer coatings by PPG® or Valspar®. Class I or II anodic finishes.

Stainless Steel: Satin brush # 4, Mirror # 8 or other readily available finishes for example, Non-Directional Brush or Random Swirl.

Galvanized Steel Sheet: Baked polyester powder.

Ourborite™ faux wood veneer finishes are available for most applications.

#### **Acoustics:**

Metal Walls are available both non-perforated (non-acoustic) and perforated (acoustic). Perforation patterns are limited only to the type of material and gauge chosen and available tooling. Presently Nelson offers more than fifty different perforation patterns ranging from diagonal (45-degree), staggered (60-degree) to straight as well as round, square and oblong holes. Our standard acoustical material consists of a Black pre-laminated fleece (SoundTex®) bonded to the concealed face of the wall panel plus a layer of minimum 1½" thick 1.5 lbs. density fiberglass insulation.

For more details and options contact your local Nelson Sales Representative or call our office at **1-800-277-6897**
